Data Visualization Lab

The Center for Innovation in Teaching and Learning is home to the Data Visualization and XR Learning Lab. The lab is comprised of multiple interactive technologies that allows learners to touch and manipulate data for large scale visualization. Learners are able to scale up their work, share, and manipulate collaboratively with multiple displays and media types. In addition, the lab also focusing on the use and exploration of XR technologies. Students can experience VR by utilizing Meta Quest headsets or the HTC Vive. For more information or a faculty consultation on reserving time in the lab, please review the information below or email the instructional technology team at init@lehigh.edu.

- Vive
- MT Canvus
- Mondopad Ultra
