Virtual Labs (LUapps)

LUapps is Lehigh’s implementation of “software virtualization”, and provides access to a large number of University-licensed Windows applications by making them available through remote access to virtual machines running on network servers. This allows the applications to be by any Lehigh user from a wide variety of devices without having to install it locally.

- Get started right away: https://go.lehigh.edu/luapps.
- Detailed information and instructions: https://lts.lehigh.edu/services/virtual-software-luapps.

Currently, LUapps is implemented in AWS (LUapps, powered by AWS)
