Network Access

Lehigh offers a wide range of networking solutions for faculty, staff, and students. Read below for common questions and answers.

Lehigh’s network (basics)

- **Use the VPN to Access the Lehigh Network from Off-campus** (Virtual Private Network) to provide off campus access to the Lehigh network
- **Remote Desktop** (connecting to a Windows 10 Lehigh computer from a Windows home computer).

- **Wireless network information:**
  - **Overview**
  - **lehigh** - the secure, encrypted, on campus wireless network id, 802.11x
  - **lehigh-guest** - open wireless for guests, not-encrypted, not assigned on campus ip addresses
  - **luna** - device network for IoT devices that can't authenticate and need to be setup with MAC addresses.
  - **Instructions** for configuring wireless, including general settings, Mac/iOS, Android, other devices
  - **Guest wireless**

- **Troubleshooting wireless**
  - **Wireless FAQ** – Does wireless seem slow? Make sure you are on lehigh and not lehigh guest!
  - **speedtest** - Test the speed of your connection.

- **LUNA network**
  - **Device compatibility** (printers, Smart TVs, etc.)
  - **Troubleshooting**

- **eduroam** - access the eduroam wireless network at other educational institutions securely with your lehigh credential
