

Connect with eduroam on iOS

To use eduroam with iOS at participating universities, follow the steps below.

Step-by-step guide

1) Enroll to use the eduroam service

Prior to using eduroam, [enable access to eduroam](#) for your account. If there are any issues, please submit a Help Desk ticket via the [web](#) or by calling the Help Desk at 610-758-HELP, requesting to be added to the eduroam service. You will not be able to use eduroam unless you have been granted access.

2) Connecting to eduroam at participating universities

1. When you're on site at a participating institution, look for the '**eduroam**' SSID while connecting to a new wireless network.
2. When you attempt to connect, enter your Lehigh username and the Lehigh domain in the following format:

'<username>@lehigh.edu' (e.g. 'dab406@lehigh.edu' – do not enter an email alias

If you require basic wireless connectivity guidance, refer to [Configuring wireless on iOS](#).

3) Validate Certificate (might be optional)

If you have never used the device on campus, you may be prompted to accept the Lehigh certificate. If you are prompted, the certificate will look like below. The certificate must be from Go Daddy with a green checkmark that it is valid.

The screenshot shows an iOS certificate validation screen. At the top, there are status bars for Verizon LTE, time (2:22 PM and 2:23 PM), and battery (68%). The screen is divided into two main sections: a left sidebar and a main content area. The sidebar contains a 'Cancel' button, the title 'Certificate', a 'Trust' button, and a 'Details' button. The main content area displays the certificate details for 'radius2.cc.lehigh.edu'. The certificate is issued by 'Go Daddy Secure Certificat...'. It is marked as 'Not Trusted' and expires on 7/8/19, 9:25:40 AM. The 'More Details' section is expanded, showing the following information:

SUBJECT NAME	
Organizational Unit	Domain Control Validated
Common Name	radius2.cc.lehigh.edu

ISSUER NAME	
Country	US
State/Province	Arizona
Locality	Scottsdale
Organization	GoDaddy.com, Inc.
