Network Access

Lehigh offers a wide range of networking solutions for faculty, staff, and students. Read below for common questions and answers.

Lehigh’s network (basics)

- Access the Lehigh Network from Off-campus with the VPN (Virtual Private Network) to provide off campus access to the Lehigh network
- Remote Access to your Office (or Lab) Computer

- Wireless (Wi-Fi) network information:
  - Overview
    - lehigh - the secure, encrypted, on campus wireless network id, 802.11x
    - lehigh-guest - open wireless for guests, not-encrypted, not assigned on campus ip addresses
    - luna - device network for IoT devices that can't authenticate to 'lehigh' and need to be setup with MAC addresses.
  - Instructions for configuring wireless, including general settings, Mac/iOS, Android, other devices
  - Guest wireless
  - Troubleshooting wireless
    - Wireless FAQ – Does wireless seem slow? Make sure you are on lehigh and not lehigh guest!
    - speedtest - Test the speed of your connection.
  - LUNA network
    - Device compatibility (printers, Smart TVs, etc.)
    - Troubleshooting
  - eduroam - access the eduroam wireless network at other educational institutions securely with your lehigh credential
