Connect with eduroam on macOS

To use eduroam with macOS at participating universities, follow the steps below.

Step-by-step guide

1) Enroll to use the eduroam service

Prior to using eduroam, enable access to eduroam for your account. If there are any issues, please submit a Help Desk ticket via the web or by calling the Help Desk at 610-758-HELP, requesting to be added to the eduroam service. You will not be able to use eduroam unless you have been granted access.

2) Connecting to eduroam at participating universities

1. When you're on site at a participating institution, look for the 'eduroam' SSID while connecting to a new wireless network.
2. When you attempt to connect, enter your Lehigh username and the Lehigh domain in the following format:

   
   \[<\text{username}>@\text{lehigh.edu}\]
   
   e.g. 'dab406@lehigh.edu' – do not enter an email alias

   Enter your Lehigh password

   If you require basic wireless connectivity guidance, refer to Configuring wireless on macOS.

3) Validate Certificate (might be optional)

If you have never used the device on campus, you may be prompted to accept the Lehigh certificate. If you are prompted, the certificate will look like below. The certificate must be from Go Daddy with a green checkmark that it is valid.
Authenticating to network “eduroam”

Before authenticating to server “radius2.cc.lehigh.edu”, you should examine the server's certificate to ensure that it is appropriate for this network.

To view the certificate, click ‘Show Certificate’.

Always trust “radius2.cc.lehigh.edu”

Go Daddy Root Certificate Authority - G2
Go Daddy Secure Certificate Authority - G2
radius2.cc.lehigh.edu

.radius2.cc.lehigh.edu

Issued by: Go Daddy Secure Certificate Authority - G2
Expires: Monday, July 8, 2019 at 9:25:40 AM Eastern Daylight Time
This certificate is valid
