

Network Access

Lehigh offers a wide range of networking solutions for faculty, staff, and students. Read below for common questions and answers.

Lehigh's network (basics)

- [Access the Lehigh Network from Off-campus with the VPN](#) (Virtual Private Network) to provide off campus access to the Lehigh network
- [Remote Access to your Office \(or Lab\) Computer](#)
- Wireless (Wi-Fi) network information:
 - [Overview](#)
 - **lehigh** - the secure, encrypted, on campus wireless network id, 802.11x
 - **lehigh-guest** - open wireless for guests, not-encrypted, not assigned on campus ip addresses
 - **luna** - [device network for IoT devices](#) that can't authenticate to 'lehigh' and need to be setup with MAC addresses.
 - [Instructions](#) for configuring wireless, including general settings, Mac/iOS, Android, other devices
 - [Guest wireless](#)
- Troubleshooting wireless
 - [Wireless \(WiFi\) Network FAQ](#) – Does wireless seem slow? Make sure you are on lehigh and not lehigh guest!
 - [speedtest](#) - Test the speed of your connection.
- [LUNA network](#)
 - [Device compatibility](#) (printers, Smart TVs, etc.)
 - [Troubleshooting](#)
- [eduroam](#) - access the eduroam wireless network at other educational institutions securely with your lehigh credential
