

# Adding a Label

Use labels to subdivide and organize the resources and activities on your course page. Keep them simple and brief. If you want to add information that is more than a sentence or two, and is not in a file that can be uploaded, consider adding a Page resource.

<https://docs.moodle.org/32/en/Label>

To add a label to your course page:

1. Click on the *Turn editing on* button (upper right hand corner).
2. In the topic area where you want to place the content, click on the *Add an activity or resource* button.
3. Choose *Label* from the *Resource* section (which is below the *Activities* section) of the Add an Activity or resource pull-down menu in a topic area. Note that a summary of this resource is displayed in the right column along with a link to More help. Click on *Add* to add this activity to your course page.

4. This will take you to the editing page for a label. By default, you have basic editing tools, to see the full range of tools, click on the icon on the left. After you have entered and formatted your label, click on *Save and return to course*.
